# ABOUT AIT

Advanced Information Technology (AIT) is a premier institute dedicated to bridging the gap between foundational computer knowledge and advanced industry demands. We specialize in providing **100% practical**, hands-on training to ensure our students are completely job-ready from day one.

Our curriculum is carefully designed to cover the most critical areas of modern technology, equipping students with **real-world problem-solving skills** in a live lab environment.

At AIT, we believe in **quality education, practical exposure, and career success**. Our mission is to empower students with the skills, confidence, and knowledge to excel in the IT industry.

**Dipal Sir**

Founder &amp; Lead Instructor

## FOUNDER & LEAD INSTRUCTOR

With an extensive background of over **14+ years** in the IT industry, Dipal Sir leads AIT with a clear vision: to empower the next generation of tech professionals.

Computer  
HardwareAdvanced  
NetworkingEthical  
HackingCyber  
Security

Under his expert guidance, students not only learn theoretical concepts but also master how to defend and manage **real-world IT infrastructures**.

Dipal Sir is also a proud member of the **Academic Association of Bhavnagar (AAB)**, committed to maintaining the highest educational standards in the region.

Advanced Information Technology

# PREMIUM IT SERVICES

Reliable. Efficient. Secure.

## ► CHIP-LEVEL REPAIRING

Expert diagnostic and chip-level repairing services for all brands of laptops and desktops. We fix what others replace, saving you time and cost.

Motherboard Repair

Power Issues

BGA Reballing

## ► DATA RECOVERY SOLUTIONS

Lost your critical data? Our advanced data recovery lab securely retrieves lost, deleted, or corrupted files from physically damaged or logically failed storage media.

Hard Disk Drive (HDD)

Solid State Drive (SSD)

Server/RAID Recovery

## ► ENTERPRISE NETWORKING

End-to-end network infrastructure solutions tailored for your business. We design, deploy, and secure robust networks to ensure zero downtime.

LAN/WAN Setup

Firewall Configuration

Server Installation

## ► IT CONSULTING & AMC

Comprehensive Annual Maintenance Contracts (AMC) and IT consulting to keep your corporate systems running smoothly with priority support.

Corporate AMC

IT Auditing

Remote Support

WE DELIVER  
**EXCELLENCE.**

# MS Office(CCC)

## With AI and Digital Literacy

Master the core essentials of digital literacy and office automation. From computer fundamentals to advanced MS Office features, Outlook configuration and modern AI tools, AIT provides **100% practical training** for career success in administrative and professional roles.

### 01 COMPUTER FUNDAMENTALS

- ✓ Definition, Uses & Types of Computers
- ✓ Input, Output & Storage Devices
- ✓ Memory & Basic Operations
- ✓ System & Application Software

### 02 MS OFFICE OVERVIEW

- ✓ Overview of Word, Excel & PowerPoint
- ✓ Daily Life Applications of MS Office
- ✓ Basic Windows Apps (Paint, WordPad)
- ✓ Installation & Activation Process

### 03 MS WORD MASTERY

- ✓ Document Creation & Editing
- ✓ Advanced Formatting & Page Setup
- ✓ Tables, Pictures & Page Numbers
- ✓ Resume & Professional Letter Creation

### 04 MS EXCEL EXPERT

- ✓ Workbook & Worksheet Basics
- ✓ Formulas & Functions (SUM, AVG, etc.)
- ✓ Charts, Sorting & Filtering
- ✓ Practical Data Management

### 05 MS POWERPOINT PRESENTATION

- ✓ Professional Presentation Design
- ✓ Animations & Slide Transitions
- ✓ Multimedia Integration (Audio/Video)
- ✓ Advanced Slide Show Techniques

### 06 OUTLOOK CONFIGURATION

- ✓ Email Account Setup (IMAP/POP3)
- ✓ Manage Emails, Folders & Contacts
- ✓ Calendar, Tasks & Notes Management
- ✓ Rules, Signatures & Auto Replies
- ✓ Email Etiquette & Best Practices

### 07 AI & DIGITAL LITERACY

- ✓ Introduction to Artificial Intelligence
- ✓ Practical AI Tools (e.g., ChatGPT)
- ✓ Effective Prompt Writing Skills
- ✓ AI for Study & Business Productivity
- ✓ Safe Internet Usage & Digital Awareness

# COMPUTER HARDWARE Maintenance & Troubleshooting

Master Hardware. Fix Problems. Build a Strong IT Career.

Learn computer hardware from the ground up and become proficient in assembling, maintaining and troubleshooting desktop systems, peripherals and networks.  
**100% practical training with real-time hands-on experience.**

## COURSE CONTENT

### 01 INTRODUCTION TO COMPUTER HARDWARE

- ✓ Introduction to Computers
- ✓ Generation of Computers
- ✓ Block Diagram of Computer
- ✓ Components of Computer System
- ✓ Basic Input, Output & Storage Devices

### 02 MOTHERBOARD & PROCESSOR

- ✓ Motherboard Components
- ✓ Types of Motherboards
- ✓ CPU – Types & Generations
- ✓ Memory (RAM) – Types & Installation
- ✓ BIOS/UEFI – Basic Settings

### 03 STORAGE DEVICES & POWER SUPPLY

- ✓ HDD, SSD – Types & Installation
- ✓ SATA, IDE, NVMe – Overview
- ✓ SMPS – Working & Connectors
- ✓ Power Management
- ✓ CMOS Battery & Its Use

### 04 ASSEMBLING A COMPUTER

- ✓ Step-by-Step PC Assembly
- ✓ Connecting Components
- ✓ Cable Management
- ✓ First Boot & POST Process
- ✓ BIOS Configuration Basics

### 05 PERIPHERAL DEVICES & PRINTERS

- ✓ Types of Printers
- ✓ Printer Installation
- ✓ Scanner & Other Peripherals
- ✓ Device Drivers Installation
- ✓ Peripheral Troubleshooting

### 06 TROUBLESHOOTING & MAINTENANCE

- ✓ Common Hardware Problems
- ✓ Diagnostic Tools & Techniques
- ✓ System Beep Codes
- ✓ Cleaning & Preventive Maintenance
- ✓ Backup & Data Safety

### 07 OPERATING SYSTEM INSTALLATION

- ✓ Windows Installation (7/10/11)
- ✓ Driver Installation
- ✓ System Updates & Settings
- ✓ Dual Boot Configuration

### 08 BASIC NETWORKING FUNDAMENTALS

- ✓ Types of Networks
- ✓ Network Devices – Hub, Switch, Router
- ✓ LAN Cable – Types & Crimping Basics
- ✓ IP Addressing – Basic Concepts
- ✓ Internet Connection Setup

# COMPUTER NETWORKING

Learn. Connect. Configure. Secure.

Build strong networking skills and become job ready in the growing IT infrastructure and support industry.

This course provides in-depth knowledge of computer networking concepts, network setup, configuration, troubleshooting and security. Ideal for students, IT professionals and anyone aspiring for a career in networking.

## COURSE CONTENT

### 01 INTRODUCTION TO NETWORKING

- ✓ What is Computer Networking?
- ✓ Need & Importance of Networking
- ✓ Types of Networks (LAN, MAN, WAN)
- ✓ Network Topologies (Bus, Star, Ring, Mesh)
- ✓ OSI Model & TCP/IP Model

### 02 NETWORK DEVICES & COMPONENTS

- ✓ Hub, Switch, Router, Bridge, Repeater
- ✓ Modem, Gateway, Access Point
- ✓ NIC (Network Interface Card)
- ✓ Cabling Types (UTP, STP, Fiber Optic)
- ✓ RJ45 Connectors & Crimping Basics

### 03 IP ADDRESSING & SUBNETTING

- ✓ IP Address (IPv4 & IPv6)
- ✓ Subnet Mask & Default Gateway
- ✓ Public vs Private IP Address
- ✓ IP Address Classes (A, B, C)
- ✓ Subnetting Concepts & Practice

### 04 NETWORK SETUP & CONFIGURATION

- ✓ LAN Setup (Peer-to-Peer & Workgroup)
- ✓ TCP/IP Configuration in Windows
- ✓ Sharing Files & Printers
- ✓ Wireless Network Setup
- ✓ Internet Connection Sharing

### 05 NETWORK PROTOCOLS & SERVICES

- ✓ Common Network Protocols (TCP, UDP, ICMP)
- ✓ DHCP, DNS, HTTP, FTP, SMTP
- ✓ Working of DHCP & DNS
- ✓ File Transfer & Remote Access
- ✓ Ping, Tracert, Ipconfig Commands

### 06 NETWORK SECURITY FUNDAMENTALS

- ✓ Need for Network Security
- ✓ Firewall, Antivirus & Anti-malware
- ✓ User Authentication & Authorization
- ✓ Network Threats & Attacks
- ✓ Safe Internet Usage Practices

### 07 TROUBLESHOOTING & DIAGNOSTICS

- ✓ Common Network Problems
- ✓ Physical Layer Troubleshooting
- ✓ IP Configuration Issues
- ✓ Connectivity Testing Tools
- ✓ Analyzing & Solving Network Issues

### 08 ADVANCED NETWORKING TOPICS

- ✓ VLAN (Virtual LAN) Basics
- ✓ Routing Concepts & Static Routing
- ✓ Network Address Translation (NAT)
- ✓ Port Forwarding Basics
- ✓ Introduction to VoIP & Video Streaming

### 09 PRACTICAL LAB SESSIONS

- ✓ Cabling & Connection Practice
- ✓ LAN Setup & Configuration
- ✓ IP Addressing & Subnetting
- ✓ Network Troubleshooting Labs
- ✓ Real-world Scenario Based Practice

# CCNA

(Cisco Certified Network Associate)

Learn. Configure. Connect. Succeed.

Build a solid foundation in networking and launch your IT career with globally recognized Cisco certification.

This course helps you master Cisco networking concepts, device configuration, IP addressing, routing & switching, security fundamentals and network troubleshooting. Get job-ready skills for network support, administration and engineering roles.

## COURSE CONTENT

### 01 INTRODUCTION TO NETWORKING

- ✓ Introduction to Cisco Networking
- ✓ OSI Model & TCP/IP Model
- ✓ Types of Networks (LAN, MAN, WAN)
- ✓ Network Topologies
- ✓ Basic Networking Concepts

### 02 NETWORK DEVICES & BASIC CONFIGURATION

- ✓ Cisco Routers & Switches Overview
- ✓ Device Boot Process
- ✓ Initial Router & Switch Configuration
- ✓ Console & Password Configuration
- ✓ Saving Configuration

### 03 IP ADDRESSING & SUBNETTING

- ✓ IP Addressing (IPv4)
- ✓ IP Address Classes (A, B, C)
- ✓ Subnet Mask & Default Gateway
- ✓ Subnetting (FLSM & VLSM)
- ✓ CIDR & Supernetting

### 04 SWITCHING FUNDAMENTALS

- ✓ Switching Concepts
- ✓ MAC Address & CAM Table
- ✓ VLAN (Virtual LAN)
- ✓ Trunking (802.1Q)
- ✓ VTP (VLAN Trunking Protocol)

### 05 ROUTING FUNDAMENTALS

- ✓ Routing Concepts
- ✓ Static Routing Configuration
- ✓ Default & Floating Static Routes
- ✓ Route Summarization
- ✓ Administrative Distance

### 06 DYNAMIC ROUTING PROTOCOLS

- ✓ Introduction to Dynamic Routing
- ✓ RIP (Routing Information Protocol)
- ✓ OSPF (Open Shortest Path First)
- ✓ EIGRP (Enhanced Interior Gateway Routing)
- ✓ Route Redistribution (Basic)

### 07 NETWORK ACCESS & MANAGEMENT

- ✓ AAA (Authentication, Authorization, Accounting)
- ✓ Telnet & SSH Configuration
- ✓ NTP (Network Time Protocol)
- ✓ Syslog Configuration
- ✓ SNMP Basics

### 08 NETWORK SECURITY FUNDAMENTALS

- ✓ Access Control Lists (ACL)
- ✓ NAT (Network Address Translation)
- ✓ Port Security
- ✓ DHCP Snooping
- ✓ Basic Security Best Practices

### 09 TROUBLESHOOTING & LAB PRACTICE

- ✓ Troubleshooting Methodology
- ✓ Common Network Troubleshooting
- ✓ Using show Commands
- ✓ Packet Tracer / GNS3 Lab Practice
- ✓ Real-world Scenarios

## CLOUD TECHNOLOGIES

# CLOUD COMPUTING

## AWS CERTIFIED CLOUD PRACTITIONER

The world is moving to the cloud. Don't just watch it happen, lead the migration. Master the fundamentals of AWS (Amazon Web Services). This course is designed to demonstrate an overall knowledge of the AWS Cloud platform, covering concepts, security, technology, and billing.

## AWS CLOUD PRACTITIONER (CLF-C01)

PREPARE FOR OFFICIAL GLOBAL CERTIFICATION

### 1 Cloud Concepts

- ✓ Define the AWS Cloud and its value proposition.
- ✓ Security, Reliability, High Availability & Agility.
- ✓ Elasticity, Pay-as-you-go pricing & Scalability.
- ✓ Global Reach and Economy of scale.
- ✓ AWS Cloud economics and architecture principles.

### 2 Security & Compliance

- ✓ Define the AWS shared responsibility model.
- ✓ Define AWS Cloud security and compliance concepts.
- ✓ Understand data protection strategies.
- ✓ AWS Identity and Access Management (IAM).

### 3 Core Technology

- ✓ Methods of deploying and operating in the AWS Cloud.
- ✓ Define the AWS global infrastructure.
- ✓ Core Compute Services (EC2, Lambda).
- ✓ Core Storage & Database Services (S3, RDS).

### 4 Billing & Pricing

- ✓ On-Demand, Reserved, and Spot Instance pricing.
- ✓ Account structures in relation to AWS billing.
- ✓ AWS Cost Explorer & Budgets.
- ✓ Identify resources available for billing support.

INFORMATION SECURITY

# CYBER SECURITY AWARENESS

PROTECTING ASSETS IN THE CHANGING SECURITY LANDSCAPE

The threat of cybercrime to both individuals and businesses is rising fast. Our Cyber Security awareness certification program is curated to create, enhance and sustain awareness about rising threats in the information world.

## TABLE OF CONTENTS

- |    |  |                                       |    |  |                                       |
|----|--|---------------------------------------|----|--|---------------------------------------|
| 01 |  | Introduction to Cyber Secure User     | 06 |  | Social Networking: Risk and Solutions |
| 02 |  | Describing Data Security and Its Need | 07 |  | Safeguarding Mobile Devices           |
| 03 |  | Securing Windows and Linux OS         | 08 |  | Cloud and Associated Threats          |
| 04 |  | Exploring Browser and Internet Safety | 09 |  | Secure Network Communication          |
| 05 |  | Securing from Email Threats           | 10 |  | Preparing for Unforeseen Threats      |

## Course Objectives

- ✓ How to secure yourself and your organisation
- ✓ How to spot vulnerabilities in systems
- ✓ Securing data and operating systems
- ✓ Best practices for Internet security

## Course Outcomes

- Secure yourself from external cyberattacks
- Secure your Personal Computer from threats
- Identify threats and prepare for incidents

# ETHICAL HACKING

## Offensive Security

"Don't just use technology, understand how it can be broken—and how to fix it."

## ADVANCED PENETRATION TESTING

### PHASE 01

### RECONNAISSANCE

- 01 Introduction to Ethical Hacking
- 02 Networking Concepts & Protocols
- 03 Footprinting & Reconnaissance
- 04 Network Scanning Techniques

### PHASE 02

### NETWORK ATTACKS

- 05 Vulnerability Assessment
- 06 Malware Threats & Countermeasures
- 07 Enumeration Techniques
- 08 System Hacking Concepts
- 09 Packet Sniffing & Traffic Analysis
- 10 Denial of Service (DoS/DDoS) Concepts

### PHASE 03

### WEB & WIRELESS

- 11 Social Engineering Techniques
- 12 Web Server Security
- 13 Web Application Security
- 14 Session Hijacking Concepts
- 15 SQL Injection Awareness
- 16 Mobile Platform Security
- 17 Cryptography Fundamentals
- 18 IDS, Firewalls & Honeypots

### PHASE 04

### ADV. DEFENSE

- 19 Wireless Network Security
- 20 Cloud & Virtualization Security
- 21 Report Writing & Output Analysis
- 22 Cyber Laws & IT Regulations
- 23 Artificial Intelligence in Cyber Sec.
- 24 IoT Security Fundamentals

### Course Highlights

- » 100% Practical Oriented Training
- » Real-World Case Studies & Live Lab
- » Complete Placement Assistance

### Who Can Join?

- » Students (IT / Non-IT) & Professionals
- » Network & System Engineers
- » Cyber Security Enthusiasts

## JS NODE.JS DEVELOPMENT

### FULL-STACK BACKEND MASTERCLASS

"Javascript is everywhere. Scale your backend with the speed of Node.js."

Our Node.js course is designed to take you from a beginner to a programming expert, ready to enter the industry as a certified full-stack developer. Master asynchronous programming and build scalable real-world applications.

#### 1-3 Module 1-3: Foundations

- ✓ What is Node.js & Key Features
- ✓ Event-Driven & Asynchronous Style
- ✓ Runtime & Local Environment Setup
- ✓ Core, Local & Export Modules

#### 4-7 Module 4-7: Packages & Servers

- ✓ NPM (Node Package Manager) Basics
- ✓ Global vs Local Packages
- ✓ Express Framework Setup
- ✓ Creating Web & HTTP Servers

#### 8-12 Module 8-12: Core Systems

- ✓ Buffers, Streams & Pipelines
- ✓ File System (I/O Operations)
- ✓ Debugging Node.js Applications
- ✓ Serving Static Resources & Middleware

#### 13-16 Module 13-16: Data & DB

- ✓ Connect with MySQL & MongoDB
- ✓ Schema, Models & CRUD Operations
- ✓ Semantic Versioning in NPM
- ✓ DevDependencies & Source Control

#### 17-19 Module 17-19: Adv. Logic

- ✓ Javascript EventLoop & Callbacks
- ✓ Promises, Chaining & Async/Await
- ✓ REST API & HTTP Methods
- ✓ Nodemon & Environment Variables

#### 20 Module 20: Project Dev

- ✓ Project Development using Node.js
- ✓ Hands-on HTTP Server Building
- ✓ Full-Stack Enhancement
- ✓ Career Ready Portfolio Build

# WHY CHOOSE AIT?

— THE ULTIMATE DESTINATION FOR IT EXCELLENCE —

## No boring lectures.

We believe in learning by doing. Get hands-on experience on real devices, live servers, and real-world scenarios from day one.

## Earn an industry-recognized, ISO-certified credential

upon course completion that adds immense value to your professional portfolio globally.

## Learn directly from the founder, Dipal Sir,

who brings 14+ years of rich IT industry experience. Get personalized attention and expert guidance.

## We build your capabilities.

We assist you with professional CV/Resume building, interview preparation, and share local job opening updates.

## FREQUENTLY ASKED QUESTIONS

### Do you provide a 100% Job Placement Guarantee?

We provide 100% Placement Assistance, not a false guarantee. We prepare you thoroughly by helping you build a strong Resume/CV, offering interview tips, and sharing job opportunities. Ultimately, securing the job depends on your acquired skills and interview performance.

### Is the certificate valid outside Bhavnagar?

Yes, absolutely! For every course, you will receive an ISO Registered Certificate. AIT is also a proud member of AAB (Academic Association of Bhavnagar). Our certificates are widely recognized across industries.

### Will the training be purely theoretical?

Not at all. We strictly follow a Practical-First approach. Whether it's Hardware, Networking, Cyber Security, or Cloud, you will perform tasks practically in our well-equipped live lab.

### Who can enroll in these courses?

Our courses are designed from scratch. College students (IT or Non-IT), working professionals wanting to upgrade their skills, or anyone with a passion for computers and technology can join AIT Lab.

YOUR SUCCESS IS OUR  
— COMMITMENT —

JOIN AIT TODAY
